

SINGLE PIECE FLOW SOLUTIONS

From conveyor components to turnkey solutions, FlexLink delivers automated production flow solutions that increase the efficiency of your production processes. The solutions minimize non-value adding operations and bottlenecks, cut throughput time by as much as half and are easy to adapt to various products. Our solutions are geared for low cost of ownership and highly reusable, requiring a minimum of maintenance with low power consumption.

SOLUTIONS FOR TOMORROW

- Innovative conveyor systems and components.
- Services and support that safeguard productivity.
- Controls och efficiency tools.

CONTROLLED AND RELIABLE MANUFACTURING FLOWS

Automatic single piece flow solutions from FlexLink are standardized to help you increase sellable throughput by minimizing waste and reduce production disturbances. Controls and efficiency tools respond to your demands for high quality, traceability and availability. All together, we offer you a predictable process for a continuous flow with high throughput.

Choose from a wide range of solutions: from small pucks to heavy duty pallets, based on single or twin track conveyor systems.

FlexLink serves a wide customer base, ranging from local producers to global corporations. Since 1980 FlexLink is a leading provider of high-end solutions to manufacturing industries.

COMPACT LINE LAYOUTS

You can easily design and build efficient line layouts thanks to the modular concept and standardized functions. Stepwise increase of capacity is achieved with layout adjustments that are straightforward to implement, yet affordable.

PROVEN AND EFFICIENT

The diverters, mergers, positioning stations, elevators and pallet rotation units have been developed based on industry know-how and the experiences from thousands of installations worldwide.

STANDARDIZED AND VERSATILE

A controlled flow of individual products is assured throughout the manufacturing process, with solutions for routing, balancing and positioning.

A SOLUTION FOR EVERY ENVIRONMENT

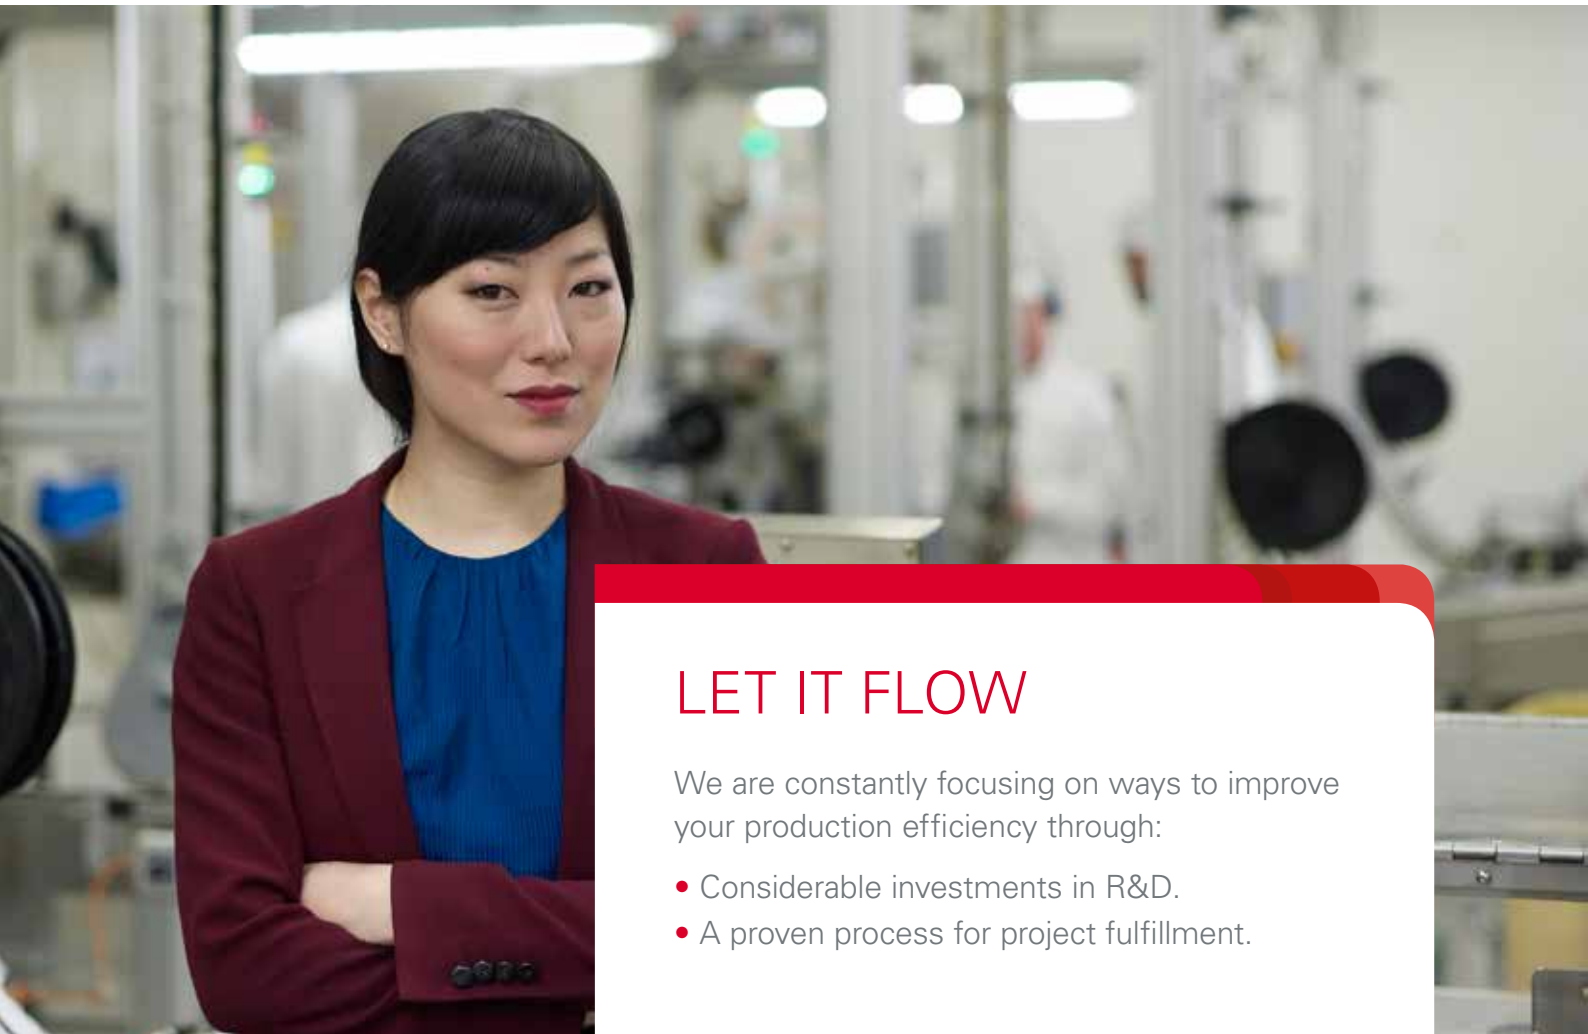

Our single piece flow solutions suit products of different sizes, adapted for each environment's specific requirements: from small test tubes or odd-shaped bottles on pucks to computers or railway engine bearing units on pallets. Production lines can be truly agile by effortless configuration and reconfiguration, allowing quick and easy introduction of new products.

FIND YOUR SOLUTION

Do you want to take significant steps towards higher efficiency?

Our experts will help you choose the solution best suited for your needs. The analysis is based on such factors as throughput, processes and the products' features as they appear in the line. Refined design and standardized functions ensure efficient solutions based on genuine industry know-how, high quality components, function modules and software. Services and support are integral parts of the unique offer as it ensures performance over time and a low cost of ownership.

FlexLink is a global provider of automated production flow solutions and the innovator of modern conveyor systems. Our solutions enable manufacturers, machine providers and system integrators to take control of efficiency – today and tomorrow.

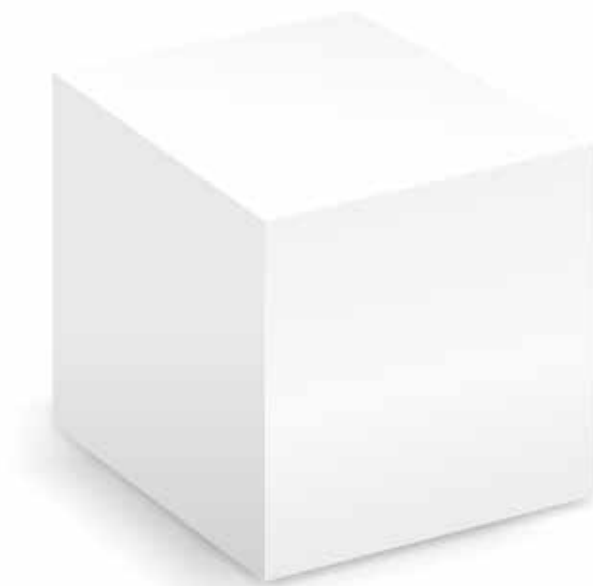

LET IT FLOW

We are constantly focusing on ways to improve your production efficiency through:

- Considerable investments in R&D.
- A proven process for project fulfillment.

THE START OF A PRODUCTIVE RELATIONSHIP?

Every component or system we design, every valuable service we offer is geared towards your production efficiency and the success of your business. Our dialogue will provide you with valuable and cost-saving answers. But we ask a lot of questions, certainly when we first meet. It is the quickest way to improving your total efficiency.

Are you looking for inspiration and ideas?

Let's discuss the effects and performance that you are looking for. We can even arrange visits to installations relevant to your needs.

Do you want the bottom line?

Our pre-studies use modern simulation and analysis tools to evaluate and verify potential improvements.

Do you need installation while maintaining your output?

We offer first class commissioning to ensure rapid and seamless start-up. So you can maintain your existing deliveries and quickly satisfy your new customers.

Are you thinking about the long-term?

Our After Sales service includes condition monitoring, preventive maintenance, emergency service and training. All to ensure you keep getting the most value from your production enhancement.

coesia

coesia.com

Coesia is a group of innovation-based industrial solutions companies operating globally, headquartered in Bologna, Italy.

Coesia's companies are leaders in the sectors of:

- **Advanced automated machinery and materials**
- **Industrial process solutions**
- **Precision gears**

Coesia's customers are leading players in a broad range of industries, including Consumer Goods, Tobacco, Healthcare, Aerospace, Racing & Automotive and Electronics.
